

# Thermo Scientific NanoDrop Products

Instruments for rapid microvolume analysis of DNA, RNA and protein samples

# NanoDrop—trusted by scientists worldwide

Rely on fast, accurate quantification of DNA, RNA and protein samples using only 1–2  $\mu\text{L}$  with Thermo Scientific™ NanoDrop™ microvolume instruments. No dilutions needed even for highly concentrated samples with pioneering sample-retention technology\* using optical measurement pedestals. For over 15 years and with over 40,000 citations, NanoDrop instruments have been helping scientists around the world do their best work. With preconfigured methods for common life science applications, NanoDrop instruments make a novice perform like an expert.

It's as simple as pipette, measure, know!

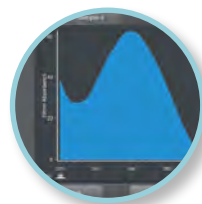

Pipette.

Measure.

Know.

## NanoDrop One/One<sup>c</sup> UV-Vis Spectrophotometer

### Intelligent analysis, streamlined workflows

- Contaminant identification and corrected concentrations with Thermo Scientific™ Acclaro™ Sample Intelligence technology
- Touchscreen interface with guided troubleshooting and pre-programmed methods for life sciences
- Modern connectivity allows seamless data transfer to PC or network via Wi-Fi, USB, or Ethernet. Export your data to Thermo Fisher Connect and access it anytime, anywhere from any device!

1. Bradford, BCA, Lowry, Pierce 660 2. NanoDrop One and NanoDrop 8000 use absorbance to measure fluorescently-labelled nucleic acids and proteins

## NanoDrop 8000 UV-Vis Spectrophotometer

### Higher throughput, full-spectrum analysis

- Measure 1 or up to 8 samples at a time on a linear array of pedestals
- Simply pipette directly from tubes or 96-well plates. Analyze 96 samples in <6 minutes
- Pre-configured applications for life science laboratories

## NanoDrop Lite UV Spectrophotometer

### Simple analysis, compact design

- Purified DNA and RNA concentration using A260
- Purified protein sample concentration from A280
- Palm-sized, portable instrument requires no PC control
- Optional docking printer prints cryogenic labels

## NanoDrop 3300 Fluorospectrometer

### Microvolume fluorescence analysis

- Wide excitation range without filter changes or monochromators
- Diverse range of measurements from routine (e.g., Thermo Scientific™ RiboGreen™ fluor, Thermo Scientific™ PicoGreen™ fluor, GFP) to advanced fluorescence analysis (e.g., nanoparticles, quantum dots, FRET)
